Introduction

- VisitEngland, VisitScotland and Visit Wales have commissioned a Domestic Sentiment Tracker to understand the impact of major events, such as the cost of living crisis, on the UK public's intent to take overnight trips, both within the UK and abroad.
- The survey addresses areas, such as: current attitude to travel (incl. concerns around travel and reassurances needed from the tourism sector), intentions of UK residents to travel for day trips, short breaks and holidays, when they plan to book and when they plan to go on their trip, as well as the destination, type of location and accommodation for their intended trip.
- This tracker is based on a UK nationally representative sample of 1,500 adults aged 16+, with additional boosts for Scotland and Wales carrying a sample of 250 respondents, for a total sample size of 1,750 UK adults aged 16+.
- Fieldwork tends to take place at the start of each month, and this wave's fieldwork was conducted between 3rd to 9th August 2026.
- The results (both, reports and data tables) are made publicly available and updated each wave at the following website:

Definitions used within this report

In this report, we look at the behaviour and attitudes of a number of separate audiences depending on when they intend to take an overnight domestic trip.

- **August to September 2026 Intenders:** Residents of the UK who claim their next domestic overnight trip will take place between August to September 2026
- **October to December 2026 Intenders:** Residents of the UK who claim their next domestic overnight trip will take place between October to December 2026

We also segment respondents by life stage and use the following definitions:

- **Younger Independents:** Aged 16-34 without children in household
- **Families:** Aged 16-64 with children in household
- **Older Independents:** Aged 35-64 without children in household
- **Retirement Age:** Aged 65+

Methodology & Further Data

Methodology

- This report presents findings from the August 2026 wave of the Domestic Sentiment Tracker, with comparisons to previous months where appropriate.
- The survey is conducted online, among a sample of the UK adult population.
- In the first stage, a nationally representative core sample of 1,500 is recruited and interviewed. This sample is then 'boosted' for Wales and Scotland to ensure sufficient base sizes for separate nation analysis. The data are then weighted to make the sample representative of the UK overall and within each nation.

PLEASE NOTE:

- The current phase of this project started in May 2026 and will run until March 2027.
- With this current phase, the questionnaire addresses the cost of living crisis' impact on trip intentions. It also covers the preference for domestic vs overseas overnight trips.
- Please note that because of the questionnaire updates, some questions are not comparable between this phase and the previous phases / waves.

Master Data Table

- The full data tables are published on the VisitBritain website alongside this report and questions' data not shown in this report are available to view there: <https://www.visitbritain.org/domestic-sentiment-tracker>

Extra questions available in the tables are:

- VB1b. Likely to spend more, less or about the same on holidays in the next 12 months, vs last 12 months
 - VB4a. Destination of next trip in the UK in the next 12 months, vs last 12 months
 - VB13b. Reasons for not taking a trip in the last 12 months
