HEADLINE ANALYSIS:

- December was a very positive month for GB tourism: trips increased by +34%, nights by +28% and spend by +39% on December 2010. It is likely that the milder weather experienced across GB during Dec 2011 compared to a wintry Dec 2010 helped with the increase in tourism.
- It was an especially good month for Welsh tourism with trips, bednights and expenditure increasing by +60%, +90% and +90% on December 2010.
- When looking at 2011 as a whole, compared to 2010, GB trips increased by +9%. Nights and spend also increased by +7% and +15%. These figures indicated a continuing trend evident during 2011 of higher spending trips, most likely due to increasing travel costs.
- Consequently, in 2011, GB trips increased to 126.6m – the highest level in the last six years. 2010 recorded 115.7m (10.9m fewer trips than 2011). As will be apparent, business tourism contributed particularly to this increase. Highlighting the extent to which 2011 was a buoyant year, the number of trips is higher than that recorded during the previous peak year of 2009 (122.5m) as well as the previous years – 2008 (114.4m), 2007 (119.9m) and 2006 (122.6m).

Please note that the latest 2011 results are provisional and subject to minor changes in subsequent months due to the inclusion of trip-takers returning from late trips. Pre-2011 results are based on full-year data so will not change.
