

United Kingdom Occupancy Survey

Serviced Accommodation Summary Report

December 2021

On behalf of VisitEngland, VisitScotland, Visit Wales and NISRA (Northern Ireland Statistics and Research Agency)

UK Occupancy Survey

This study has been commissioned by the National Boards of England, Northern Ireland, Scotland and by Visit Wales (part of the Welsh Government) with support from the Department for Digital, Culture, Media and Sport.

The results have been compiled by The Research Solution.

UK % Bedspace Occupancy*

2017 - 2021

Table 1: UK Bedspace Occupancy

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
2017	39	44	46	53	54	57	61	61	58	55	51	50
2018	44	50	52	54	57	58	60	63	58	57	53	50
2019	43	50	51	55	57	58	60	63	57	57	53	50
2020	45	52	25	15	16	15	20	36	32	27	19	18
2021	16	19	23	24	32	43	48	54	52	52	47	42

Percentage of available bedspaces which were occupied across the UK

* See methodological note on slide 8

N.B. Due to the Covid-19 outbreak in the UK, the serviced accommodation industry saw an unprecedented number of establishments temporarily close their doors from late March 2020 with further lockdowns at different times throughout the year across the four nations. On a sector-wise level these proportions will be an inflation of the occupancy levels in relation to previous years as many more serviced accommodation providers will have been closed owing to the extraordinary circumstances.

UK % Bedroom Occupancy*

2017 – 2021

Table 2: UK Bedroom Occupancy

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
2017	54	61	64	69	73	80	83	81	83	78	75	68
2018	63	71	73	75	78	82	85	83	83	81	76	69
2019	63	70	73	75	78	80	84	82	82	80	76	68
2020	63	70	37	20	21	22	27	48	47	40	28	26
2021	24	27	34	34	46	58	64	72	72	68	67	55

Percentage of available bedrooms which were occupied across the UK

* See methodological note on slide 8

N.B. Due to the Covid-19 outbreak in the UK, the serviced accommodation industry saw an unprecedented number of establishments temporarily close their doors from late March 2020 with further lockdowns at different times throughout both 2020 and 2021 across the four nations. On a sector-wise level these proportions will be an inflation of the occupancy levels in relation to previous years as many more serviced accommodation providers will have been closed owing to the extraordinary circumstances.

UK OCCUPANCY OVERVIEW

3,950 hotels, guesthouses and bed and breakfast establishments throughout the UK supplied data during December 2021, upon which the figures in this summary of results are based (see notes 2 and 3, on Slide 8 – sample sizes and calculation of rates).

During December 2021, occupancy levels were significantly higher compared to the same month in 2020 when Covid-19 restrictions were still in place across many areas of the UK.

Bedspace occupancy was 42% in December 2021, a rise of 24 percentage points on the same month in 2020 (18%). Room occupancy followed a similar pattern and was also much higher than in December 2020, up from 26% to 55% in December 2021, an increase of 29 percentage points.

Summary of Findings

Occupancy levels across the UK as a whole were significantly higher during December 2021 when compared to the same month in 2020, when COVID-19 restrictions were still in place across many areas of the UK. Room occupancy levels saw an upturn of 29 percentage points from 26% in December 2020 to 55% this year. Bed occupancy followed a similar pattern with an increase in occupancy levels, up by 24 percentage points from 18% in 2020 to 42% in December 2021.

Across England, room occupancy levels witnessed an increase of 29 percentage points in December 2021 when compared with the same month in 2020, rising from 27% to 56%. Bed occupancy increased by 23 percentage points; up from 19% in December 2020 to 42% in December this year.

Across **Wales** as a whole, occupancy rates were significantly higher during the month of December 2021 when compared to the same month in 2020. Room occupancy was up by 31 percentage points on the same month the previous year whilst bedspace occupancy saw an increase of 23 percentage points, up from 17% in 2020 to 40% in December 2021.

Both room and bedspace occupancy levels in **Scotland** during December 2021 saw an increase when compared to the previous year. Room occupancy levels in Scotland rose by 17 percentage points from 17% to 34% with a significant increase in bedspace occupancy, up 23 percentage points during December from 9% in 2020 to 32% in 2021.

As with all other nations, **Northern Ireland** saw a rise in occupancy levels across December when compared with the same month in 2020. Room occupancy was 40%, an increase of 18 percentage points on 2020 and bedspace occupancy doubled from 17% in December 2020 to 34% in December this year.

With travel across the world still affected by the Covid-19 pandemic, bedspace occupancy by non-UK residents was 17% in Northern Ireland and 1% in Wales. (comparable figures for England and Scotland are no longer collected – see note 5a in the Methodology section of this report).

% Occupancy Levels: December 2019 – 2021*

Table3: Bedspace Occupancy

	2019	2020	2021
England*	51	19	42
N. Ireland	32	17	34
Scotland	40	9	32
Wales**	39	17	40
UK	50	18	42

Table 4: Bedroom Occupancy

	2019	2020	2021
England*	71	27	56
N. Ireland	45	22	40
Scotland	51	17	32
Wales**	49	25	56
UK	68	26	55

Table 5: Sample Size*

	2019	2020	2021
England*	3367	2819	3457
N. Ireland	161	110	240
Scotland	126	79	84
Wales**	173	134	169
UK	3827	3142	3950

* See methodological note on slide 8

** Due to a change in methodology comparisons with 2019 figures cannot be made.

Methodology (1)

1. The figures in this summary are based on data available within eight weeks of the end of the month. In some cases the boards will re-run the monthly analysis later in the year to include data which was received too late for inclusion in this summary. These later figures will be used in the 2021 Annual Summary.
2. The minimum target sample size for Northern Ireland, Scotland and Wales is 200 open establishments per month while in England the target minimum sample size is 750. Larger sample sizes may be used in some areas in order to enable Boards to undertake further analysis based on geographical sub-divisions of the data.
3. In the calculation of occupancy rates for the UK, occupancy rates from each country have been weighted using the number of bedspaces known to be available in the area.
4. *Occupancy rates:*

Bedspace occupancy:	Percentage of available bedspaces which were occupied
Room occupancy:	Percentage of available rooms which were occupied
Non-UK bedspace occupancy:	Percentage of available bedspaces which were occupied by non-UK guests
Percentage of non-UK guests:	Percentage of arrivals which were non-UK guests
Percentage of non-UK bednights:	Percentage of occupied bedspaces which were occupied by non-UK guests
5. It should be noted that:
 - a) because of changes in the data collected, it is no longer possible to provide UK/non-UK figures for Scotland and England or figures relating to arrivals for Wales.
 - (b) from June 2010, English occupancy data includes additional occupancy information for the 100+ room hotel sector supplied by STR Global. Given the change in the structure of the sample, care should be taken in the interpretation of year-on-year changes.

Methodology (2)

6. Accuracy of the results: The statistical accuracy of the results depends upon the size of the sample, the variation in occupancy rates between establishments and (to a lesser extent) the size of the survey population. As the sample is self-selecting, it is not possible to calculate true statistical margins of error. However, it is likely the results are accurate to between $\pm 5.9\%$ (sample of 50) to $\pm 1.6\%$ (sample of 650). As there continues to be a substantial core of survey participants providing data every month, the patterns identified in the survey are believed to accurately reflect overall trends in the use of serviced accommodation.

7. * **Methodological note:** From June 2017, the England Occupancy estimates have been collected using a revised methodology. The resultant data are statistically more robust but it has caused a break in trends for England and the UK. From June 2017, the new methodology is based on the STR syndicated survey whereas prior to June 2017 the England occupancy data were collected via a bespoke panel with a considerably lower sample size. This methodological change impacted trends and means direct comparisons between England and UK figures collected from June 2017 should not be made with those assembled prior to June 2017. Data for Scotland, Wales and Northern Ireland remains unaffected by the change.

Background

The types of accommodation included in the survey are defined as *tourist accommodation which is arranged in rooms and where bed-making and cleaning services are provided*. This includes:

Hotels, motels, inns, guest houses, farm guest houses and bed and breakfast establishments

The types specifically excluded are:

Youth hostels and University accommodation.

This summary has been compiled by The Research Solution (UK Survey Co-ordinator for 2021) from figures supplied by (or on behalf of) the National Tourist Boards of England, Northern Ireland (working with NISRA, the Northern Ireland Statistics and Research Agency), Scotland and Visit Wales (part of the Welsh Government).
